

Abstract

A compound represented by the formula:

wherein m is 1 or 2, R^1 is a halogen or an optionally halogenated C_{1-2} alkyl; one of R^2 and R^3 is a hydrogen atom and the other is a group represented by the formula:

wherein n is 3 or 4; R^4 is a C_{1-4} alkyl group substituted by 1 or 2 hydroxy groups, or a salt thereof shows tyrosine kinase-inhibiting activity.
